Discussion with respect to the above-noted results can be found in the Company's MD&A.

1 – Adjusted EBITDA is an unaudited non-GAAP measure and does not have any standardized meaning prescribed under IFRS and, therefore, may not be comparable to similar measures employed by other reporting issuers. Management believes Adjusted EBITDA provides meaningful information with respect to the financial performance and value of the Company, as items that may obscure the underlying trends in the business' performance are excluded. Adjusted EBITDA is defined and calculated by the Company as earnings (loss) before interest, taxes, depreciation/amortization of property and equipment, intangible assets and right-of-use assets, share-based compensation expense, foreign exchange gains (losses) recorded through profit and loss, impairment losses and other costs or income that are: (i) non-operating; (ii) non-recurring; and/or (iii) are related to strategic initiatives. The Company classifies income or costs as non-recurring if income or costs similar in nature are not reasonably expected to occur within the next two years nor have occurred during the prior two years, and such costs are significant.
